Caring for your flowers

How to care for your Tied arrangement

IMPORTANT! Do not untie your flowers.

After removing wrapping, trim ends of stems.

Place arrangement in a suitable container and fill with water.

As far as possible avoid putting flowers in a draughty or hot location and keep out of direct sunshine

How to care for your Roses

Cut the stems and place immediately in **DEEP** water up to the neck.

Leave in a cool place for "a good drink"

Arrange in a **DEEP** vase or again cut the stems to suit the vase, allowing for **PLENTY** of stem in water.

DO NOT leave them in a draught, near heat, or in direct sunshine.

If the roses should flop at their heads re-cut and plunge the stems only into boiling water for a short time.

How to care for your flowers in a container

These flowers have been arranged in a special material which should **NOT** be removed from the container.

FILL CONTAINER FULL OF WATER EVERY DAY.

Place protective material under flower display to avoid damage from moisture.
